

## Enjoy Nature...

Rocky peaks, sometimes called the Oregon Alps. Fifty-two named lakes. Deer, bobcat, bear, elk, bighorn sheep, and countless songbirds. Ancient forest, untamed rivers, and wildflower meadows. Less than one percent of the visitors of Yosemite or Yellowstone.

Come hike and see this undiscovered corner of the Old West.

## Touch History...

Nineteenth-century prospectors scoured every ridge and canyon in search of gold. Their stories remain in countless artifacts and empty holes carved into stone. Sometimes they were lucky--the ghost town of Cornucopia rests atop of one of America's richest mines.
